

Pre-Application Site Visit Report

Project 6639226, 12328 RIVIERA PL NE

Assessment Completed: 1/19/2018

Project Description: Repair of an existing residential dock on Lake Washington. Framing to be replaced with ACZA treated fir. Stringers to be 4"x8" ACZA treated fir. Joists/pile caps to be 6"x8" ACZA treated fir. Worn wooden decking to be replaced with ThruFlow grated panels. Piles to be sleeved if/as necessary

Primary Applicant: [Joseph Steele](#)

This report lists a preliminary assessment of project requirements based on your pre-application site visit (PASV). The PASV is completed by site inspectors from the Seattle Department of Construction and Inspections (SDCI).

Next Steps

1. Review the requirements in this report and contact the staff members listed below with questions.
2. Schedule an appointment for permit application intake with SDCI. **Please bring a copy of this report to your intake appointment.**

Questions About This Report

If you have questions about the information in this report, contact:
Kathleen H Wilson, (206) 233-7932, Kathleen.Wilson@seattle.gov

Other Resources

- General questions about the permit process: Contact the SDCI Applicant Services Center (ASC) at 206-684-8850.
- User-friendly guides to city permitting processes: [SDCI](#) and [SDOT](#).
- [Detailed zoning information](#).
- Visit our [permit type pages](#) for step-by-step instructions and forms for preparing your application and plans for review.

Pre-Application Site Visit (PASV) Requirements

PASV report requirements may be subject to additions, changes, or modifications by the department. The purpose of the report is to alert the applicant that there may be unusual or complex site conditions that trigger requirements from the department regarding this project. **The applicant is responsible for providing all required documents at the intake appointment.** If you have questions about this report or the PASV process, please contact the SDCI Site Development Team at (206) 684-8860.

Note: Any project application associated with the development site can utilize the results from this PASV if the application is accepted by SDCI within 24 months of the above inspection date. After 24 months, the applicant must apply for another PASV. No extensions will be granted.

ECA Mapping Unit and Type

This project site appears to include the following ECAs and/or buffers:
Potential slide
Liquefaction

Earth Disturbance

Please show all existing and proposed retaining walls/rockeries and the exposed height.

Existing ROW Conditions

RIVIERA PL NE

Street conditions:

Asphalt paving

Unimproved

Curb conditions:

No curb adjacent to site

A storm inlet does not appear to be located <350 ft from the site and prior to crossing a public right of way.

Potential Impacts to Seattle Parks Property

Park within 100 LF

Construction Stormwater Control

All projects with earth disturbance, regardless of size, require temporary and permanent stormwater control in accordance with the Construction Stormwater Control (CSC) Technical Requirements Manual (Director's Rule 17-2017, Volume 2, [Storm Water Manual Vols. 1-5](#)).

Show the following on the [Construction Stormwater Control and Soil Amendment Standard Plan](#):

Place compost socks, compost berms, filter fabric fencing, straw bales, straw wattles, or other approved perimeter control BMPs to eliminate construction stormwater runoff.

Show the location of a stabilized construction access to the site; show methods to eliminate uncontrolled conveyance of mud and dirt into the right of way (ROW).

Cover bare soil with compost blankets, straw, mulch, matting, or other approved equal to control construction stormwater runoff.

A First Ground Disturbance inspection is required before any ground disturbance related to this permit, including demolition, tree cutting, clearing, grubbing, and grading. After your permit is issued, schedule an inspection by calling (206) 684-8900 or [online](#).

Inspectors Notes

Site is across the street from, and at a lower elevation than, the Burke Gilman Trail. No unusual site conditions, plot plan appears to be accurate. If you have questions or concerns about ECA submittal requirements or possible submittal exemptions, go to the 20th Floor, Seattle Municipal Tower, and ask to speak to the on-call geotechnical engineer.

Standard Submittal Requirements for Projects in an ECA

Submit a geotechnical report with the permit intake submittal package. Geotechnical report must be signed and stamped by a geotechnical engineer licensed in the State of Washington per [SMC 22.170.070](#), [SMC 25.09](#), and Director's Rule 5-2016, [General Duties & Responsibilities of Geotechnical Engineers](#).

Provide a topographic survey with 2-foot contours on and within 25-feet of the property, stamped by a licensed land surveyor (see [SMC 25.09.330A](#))

The site is mapped as liquefaction prone. A geotechnical report is required to address liquefaction potential and, if needed, mitigation (see [SMC 25.09.100](#)).
